

Bluetooth Speaker

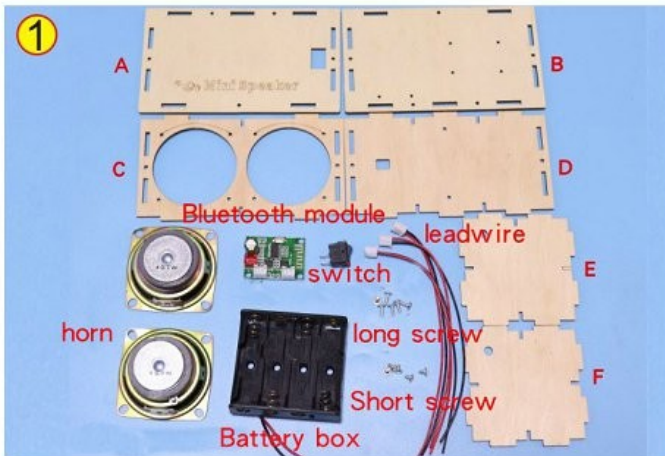

Assembly model

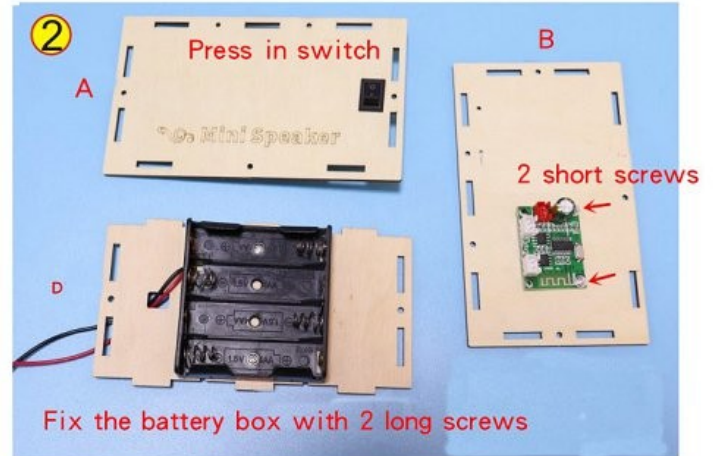

Brief introduction

Bluetooth audio refers to the built-in Bluetooth chip, which is connected to Bluetooth playback devices such as mobile phones, tablets, and other devices to freely listen to music. This toy provides children with a clear understanding of Bluetooth speakers.

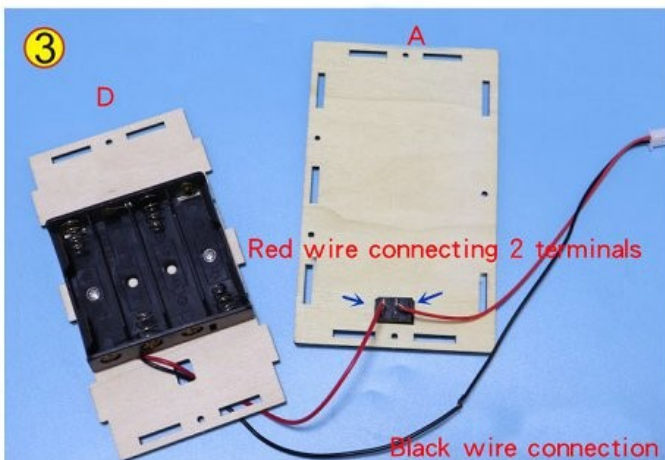

操作步骤

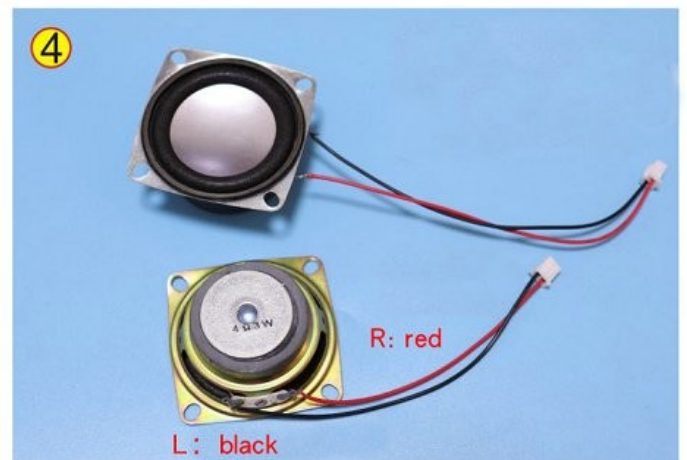

1.Remove 6 wooden boards

2.Pay attention to the direction of the switch

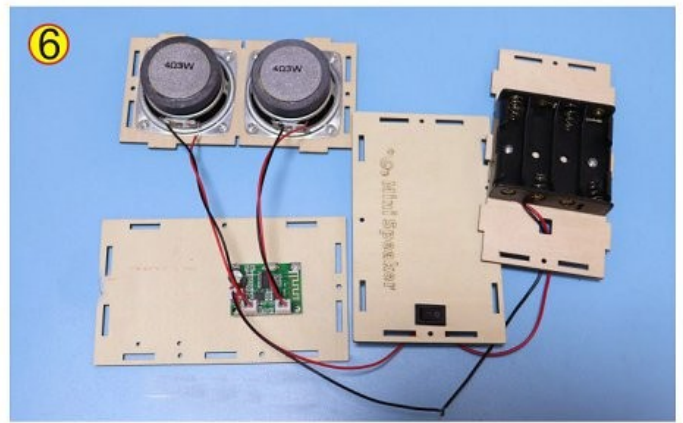

3.Red wire connection switch

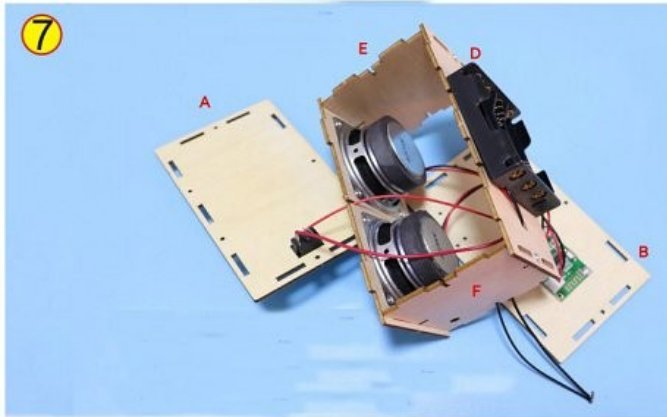

4.Terminal wire connection horn

5.Eight short screws to secure the horn

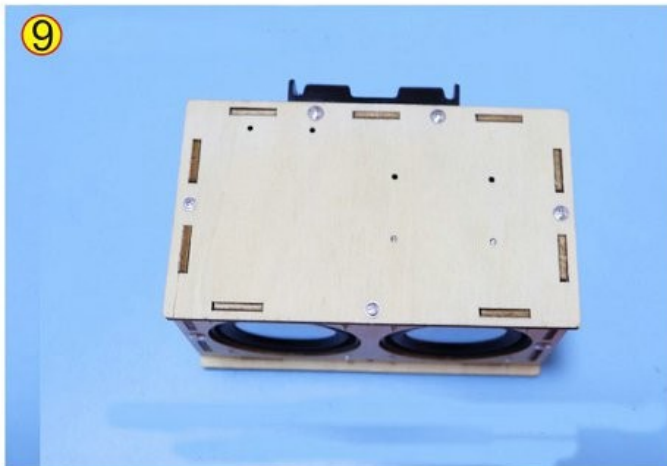

6.The red interface is the power supply.

7.As shown in the figure, fix the E/F/D board

8.Install the cover plate

9.Install the bottom plate

10.Install the battery, turn on the switch, and connect the phone

Precautions:

1. Step 7: Pay attention to connecting the C-E-F-D board in sequence.
2. Steps 8 and 9 should be careful not to press forcefully.
3. The toy needs to purchase a good battery, and the higher the discharge current, the better. If noise, please lower the volume!
4. If Bluetooth cannot be searched or crashes, it may be due to the battery level insufficient.
